

QUALITY ASSURANCE REQUIREMENTS

Certified Material Test Report (CMTR) identifying and reporting the results of all chemical and physical tests furnished by the manufacturer are required. The CMTR submitted will be subject to technical review and approval by the purchaser. One copy of the test report shall accompany the material.

The CMTR shall contain the following information: Heat/Lot number to provide traceability back to the raw material, code or standard that the item meets, chemical composition, mechanical properties, supplemental tests required by the material specification or purchase order, and signature of an authorized Quality representative or notary public stamp.

Any material submitted without a CMTR will be processed as nonconforming material.
